

FLR INDUSTRIAL MARKETING

Sealing Solutions and Industrial Products You Can Rely On

COMPANY PROFILE

Supporting maintenance teams and procurement departments with reliable industrial sealing components and responsive supply coordination.

RELIABLE SEALING SOLUTIONS FOR INDUSTRIAL APPLICATIONS

Supporting maintenance teams with dependable sealing components for pumps, hydraulic systems, and rotating industrial equipment.

FLR Industrial Marketing provides industrial sealing components and maintenance products supporting manufacturing facilities, processing plants, and heavy equipment operations. We work closely with procurement teams and maintenance departments to supply components that meet operational requirements, technical specifications, and equipment servicing needs.

Through established sourcing channels and responsive coordination, we support plant maintenance and equipment reliability by providing dependable industrial sealing products including O-rings, oil seals, hydraulic seals, gasket sheets, and related industrial components used in various industrial applications.

Reliable Industrial Supply

Dependable sourcing of sealing and maintenance components for industrial operations.

Specification-Based Product Matching

Assisting clients in identifying the correct sealing components based on equipment requirements.

Responsive Procurement Support

Coordinating with procurement teams to support maintenance and operational requirements.

Quality Industrial Components

Providing dependable sealing components used in plant operations and equipment maintenance.

ABOUT US

FLR Industrial Marketing was established in October 2013 and is engaged in the supply and distribution of industrial products to government agencies, institutional clients, and private sector companies across Northern Mindanao.

With over a decade of experience in procurement support and supply chain coordination, the company has developed operational expertise in delivering industrial components that meet technical specifications, procurement standards, and operational requirements.

In recent years, FLR Industrial Marketing has expanded its focus into industrial sealing and maintenance solutions, supplying products such as hydraulic seals, oil seals, O-rings, gasket sheets, engineering plastics, bearings, and related industrial components used in manufacturing plants, processing facilities, and heavy equipment operations.

The company works closely with maintenance teams, procurement departments, and plant operations personnel to ensure accurate specification matching, reliable product supply, and responsive coordination.

Leveraging its background in compliance-driven procurement and structured documentation, FLR Industrial Marketing maintains disciplined operational processes that support long-term client partnerships and dependable supply.

Through strategic sourcing networks and logistics coordination, the company supports clients throughout Mindanao while progressively expanding its supply capability to other regions in the Philippines.

Our objective is simple:

To provide reliable industrial components that support operational continuity and equipment performance.

MISSION

VISION

MISSION

To provide reliable industrial sealing components and maintenance products that support equipment performance and operational efficiency.

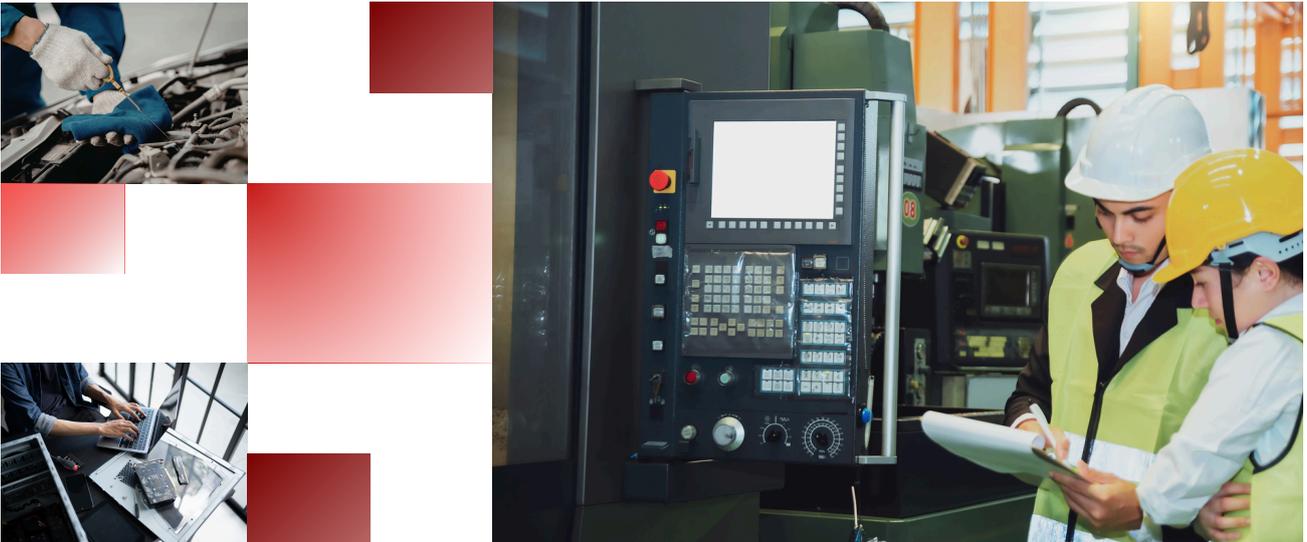

VISION

To be a trusted industrial supply partner supporting maintenance teams and procurement departments across the Philippines.

CORE COMMITMENT

Integrity, reliability, and responsive service in every client engagement.

WHY CHOOSE FLR INDUSTRIAL MARKETING

FLR Industrial Marketing works closely with procurement teams, maintenance departments, and plant operations to provide dependable industrial components that support equipment reliability and operational efficiency.

Reliable Industrial Supply

We provide industrial sealing and maintenance components that meet operational requirements for manufacturing, processing, and heavy equipment applications.

Experience in Structured Procurement

With over a decade of experience supporting government and institutional procurement, we understand compliance requirements, documentation standards, and structured purchasing processes.

Accurate Specification Matching

We assist clients in identifying the correct sealing components based on equipment requirements and technical specifications to ensure compatibility and reliability.

Responsive Coordination

We maintain clear communication and coordination with procurement and maintenance teams to support urgent requirements and ongoing operational needs.

Strategic Sourcing Network

Through established sourcing channels and supplier relationships, we are able to provide a range of industrial sealing products and related components.

Commitment to Long-Term Partnerships

Our goal is to build dependable relationships with clients by providing reliable supply support and responsive service.

INDUSTRIES WE SUPPORT

FLR Industrial Marketing provides industrial sealing components and maintenance products supporting various sectors that rely on dependable equipment operation and plant maintenance.

Food Processing and Manufacturing

Supporting food production and processing facilities requiring reliable sealing components for machinery, pumps, conveyors, and processing equipment.

Packaging and Industrial Materials

Providing industrial components used in equipment supporting packaging, paper, and industrial materials manufacturing operations.

Wood Processing and Industrial Manufacturing

Supplying sealing and maintenance components used in wood processing plants and manufacturing equipment.

Construction Materials and Industrial Engineering

Supporting companies involved in construction materials production and industrial engineering services requiring dependable components for machinery and plant maintenance.

Sugar Milling and Agro-Industrial Processing

Supporting sugar mills and agro-industrial plants requiring sealing components for pumps, conveyors, hydraulic systems, and heavy rotating equipment used in milling and processing operations.

Logistics and Shipping Operations

Providing industrial components used in equipment and mechanical systems supporting logistics, shipping, and port operations.

STRATEGIC INDUSTRIAL COVERAGE IN MINDANAO

Mindanao hosts several key industrial regions supporting food processing, manufacturing, agriculture, logistics, and industrial processing operations. These sectors rely on dependable equipment operation and structured maintenance systems to sustain productivity and operational efficiency.

FLR Industrial Marketing focuses on supporting maintenance teams and procurement departments within these industrial environments by supplying sealing components and related maintenance products used in pumps, hydraulic systems, conveyors, compressors, and rotating equipment.

Through established sourcing channels and responsive supply coordination, FLR Industrial Marketing aims to support industrial facilities and maintenance operations across major economic centers in Mindanao.

Northern Mindanao

Anchored by Cagayan de Oro and the PHIVIDEC Industrial Estate, Northern Mindanao is one of the region's most active industrial hubs. The area hosts food manufacturing plants, feed mills, beverage facilities, and logistics operations serving the broader Northern Mindanao market.

Davao Region

The Davao Region is a major economic center in Mindanao with strong activity in food processing, construction materials, and logistics. Davao City functions as a commercial and industrial hub supporting manufacturing facilities, export-oriented agriculture, and port operations.

SOCCKSARGEN

Centered in General Santos City, this region is known for its tuna processing industry, cold storage facilities, and food manufacturing plants that operate around the clock and require dependable industrial equipment maintenance.

Caraga Region

Caraga is an important industrial zone driven by mining operations, timber processing, and agri-industrial activities. Mining equipment and processing plants rely heavily on hydraulic systems, pumps, conveyors, and other industrial machinery.

Zamboanga Peninsula

The Zamboanga Peninsula hosts major fish processing and canning facilities along with marine operations and port logistics that support regional and export markets.

FLR Industrial Marketing continues to expand its supply network and industrial support coverage by working with maintenance teams, procurement departments, and industrial operators requiring reliable sealing components for equipment servicing and plant maintenance.

TARGET INDUSTRIES

FLR Industrial Marketing continues to expand its support to additional industrial sectors that rely on sealing systems and maintenance components for operational reliability.

Mining and Heavy Equipment Operations

Heavy equipment and processing machinery requiring hydraulic seals, oil seals, and gasket materials.

Power Generation Plants

Supporting maintenance teams requiring sealing components for pumps, turbines, compressors, and industrial systems.

Manufacturing and Industrial Processing Plants

Facilities requiring continuous equipment maintenance and reliable industrial component supply.

OUR INDUSTRIAL SUPPLY CAPABILITIES

FLR Industrial Marketing supports procurement teams, maintenance departments, and plant operations by providing reliable access to industrial sealing components and maintenance products required for equipment servicing and operational continuity.

Industrial Sealing Components Supply

Supply of O-rings, oil seals, hydraulic seals, gasket sheets, and related sealing components used in industrial machinery, pumps, hydraulic systems, and rotating equipment.

Specification-Based Product Matching

Assistance in identifying the appropriate sealing components based on equipment requirements, technical specifications, and application conditions.

Procurement and Supply Coordination

Coordination with procurement teams to ensure timely sourcing and delivery of industrial components required for maintenance and operational requirements.

Strategic Sourcing Network

Access to established supplier networks that enable the sourcing of a range of industrial sealing and maintenance components.

Support for Maintenance Operations

Providing dependable industrial components used by maintenance teams for equipment servicing, preventive maintenance, and repair operations.

INDUSTRIAL EQUIPMENT APPLICATIONS WE SUPPORT

FLR Industrial Marketing supports maintenance teams and plant operations by supplying sealing components used in a wide range of industrial equipment. These components play a critical role in maintaining system integrity, preventing fluid leakage, and ensuring the reliable operation of rotating and hydraulic machinery across industrial facilities.

Our supplied sealing solutions are commonly used in equipment requiring dependable sealing performance under demanding operating conditions, including pressure, temperature, and continuous mechanical movement.

Equipment Applications

Pumps

Sealing components used in centrifugal pumps, slurry pumps, water pumps, and chemical pumps commonly found in industrial processing, utilities, and manufacturing facilities.

Hydraulic Systems

Hydraulic seals, rod seals, piston seals, and wiper seals used in hydraulic cylinders and power systems supporting heavy equipment and industrial machinery.

Compressors

Sealing components used in air compressors and industrial compression systems supporting manufacturing plants and processing facilities.

Rotating Equipment

Oil seals, mechanical seals, and related components used in motors, gearboxes, conveyors, and other rotating machinery.

Food Processing Equipment

Sealing components used in machinery supporting food production, processing, packaging, and material handling systems.

Heavy Equipment and Industrial Machinery

Hydraulic and sealing components used in construction equipment, mining machinery, material handling equipment, and plant maintenance operations.

CORE PRODUCT CATEGORIES

Core Industrial Sealing Products Supplied

OIL SEAL

VC MATERIAL

- ✓ OIL & GREASE RESISTANT
- ✓ CHEMICAL RESISTANT
- ✓ WEAR RESISTANT

O-RINGS

VITON & NBR MATERIAL

- ✓ CHEMICAL & HEAT RESISTANT

- ✓ OIL & ABRASION RESISTANT

WEAR RINGS

PHE MATERIAL

- ✓ SELF LUBRICATING
- ✓ THERML RESISTANT
- ✓ WEAR RESISTANT

PISTON SEALS

DC12 MATERIAL

- ✓ OIL & GREASE RESISTANT
- ✓ WEAR RESISTANT
- ✓ DURABLE

ROD SEALS

PU MATERIAL

- ✓ AIL RESISTANT
- ✓ WEAR RESISTANT
- ✓ LONG SERVICE LIF

WIPER SEAL

NBR MATERIAL

- ✓ OIL RESISTANT
- ✓ WEAR RESISTANT
- ✓ DURABLE

CORE PRODUCT CATEGORIES

Core Industrial Sealing Products Supplied

MONO SEAL

PU MATERIAL

- ✓ HIGH IMPACT
- ✓ WEAR RESISTANT
- ✓ CHEMICAL RESISTANT

GUIDE STRIPS

PREMIUM QUALITY

- ✓ LOW FRICTION
- ✓ WEAR RESISTANT
- ✓ EASY TO MACHINE

ENGINEERING PLASTIC TUBE

PTFE MATERIAL

- ✓ LOW FRICTION
- ✓ CHEMICAL RESISTANT
- ✓ HEAT RESISTANT

ENGINEERING PLASTIC ROD

PU MATERIAL

- ✓ HIGH IMPACT
- ✓ WEAR RESISTANT
- ✓ CHEMICAL RESISTANT

SPIRAL WOUND GASKET

STAINLESS STEEL WITH GREEN FILLER

- ✓ HIGH PRESSURE
- ✓ CORROSION RESISTANT
- ✓ VERSATILE SEALING

NON-ASBESTOS COMPRESSED GASKET SHEETS

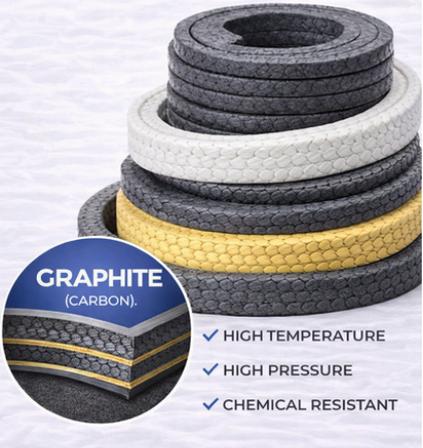

- ✓ PIPING
- ✓ HVAC
- ✓ GENERAL INDUSTRY

CORE PRODUCT CATEGORIES

Core Industrial Sealing Products Supplied

MECHANICAL PACKINGS
GRAPHITE MATERIAL

GRAPHITE
(CARBON)

- ✓ HIGH TEMPERATURE
- ✓ HIGH PRESSURE
- ✓ CHEMICAL RESISTANT

MECHANICAL SHAFT SEAL
CARBON/CERAMIC MATERIAL

✓ HIGH PRESSURE
✓ CHEMICAL RESISTANT
✓ LOW FRICTION

CARBON CERAMIC

RUBBER SHEETS
NBR MATERIAL

NBR
(NITRILE BUTADIENE RUBBER)

- ✓ OIL RESISTANT
- ✓ CHEMICAL RESISTANT
- ✓ HIGHLY DURABLE

O-RING STRIPS
NBR MATERIAL

NBR
(NITRILE BUTADIENE RUBBER)

- ✓ OIL RESISTANT
- ✓ CHEMICAL RESISTANT
- ✓ HIGHLY DURABLE
